PROJECTS

NeuraRig | MERN Stack (MongoDB, Express, React, Node.js), Groq API, JWT

Feb. 2025 – May. 2025

- Architected an AI-powered e-commerce platform for computer accessories with full CRUD capabilities for system administrators.
- Leveraged the Groq API to build a specialized hardware chatbot capable of parsing user constraints to ensure build compatibility.
- Secured client-server communication using stateful cart storage, JWT-driven authentication sessions, and securely encrypted user databases.
- Optimized application UX with seamless React Router navigation, detailed product rating workflows, and a full checkout pipeline.

Sphere | MERN Stack, Socket.IO, Supabase Storage, Leaflet, Google OAuth

Oct. 2025 – Jan. 2026

- Developed a multi-tier university community platform featuring real-time chat, learning management systems, and group forums.
- Designed and implemented a modular backend API with Express using strict input validation middleware and Mongoose object modeling.
- Built automation features including a resume/CV data extractor to seamlessly populate user portfolios and academic histories.
- Optimized frontend state and map rendering using React 19, Material-UI (MUI), and Leaflet map component APIs.
